Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of

Americana. • The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming. • Sure to delight fans of all breeds of dogs • A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York. • A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show • Photographers and contemporary art lovers will also love this celebration of Dolly Faiby-

shev's work • Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel Will poor, kindhearted Yeh-Shen get to the spring festival? The Volkswagen Rabbit, Jetta (A1) Diesel Service Manual: 1977-1984 covers 1977 through 1984 models with diesel engines, including those built on the "A1" platform. This manual includes both the American-made and German-made Rabbits, VW Jettas, and VW Pickup Trucks with diesel engines built for sale in the United States and Canada. Engines covered: * 1.6L Diesel (engine code: CK, CR, JK) * 1.6L Turbo-Diesel (engine code: CY)

This volume presents realistic estimates for the level of fuel economy that is achievable in the next decade for cars and light trucks made in the United States and Canada. A source of objective and comprehensive information on the topic, this book takes into account real-world factors such as the financial conditions in the automotive industry, costs and benefits to consumers, and marketability of high-efficiency vehicles. The committee is com-

posed of experts from the fields of science, technology, finance, and regulation and offers practical evaluations of technological improvements that could contribute to increased fuel efficiency. The volume also examines potential barriers to improvement, such as high production costs, regulations on safety and emissions, and consumer preferences. This practical book is of considerable interest to car and light truck manufacturers, policymakers, federal and state agencies, and the public.

This is a story of belief, disillusionment and atonement. Long identified with leftist causes, the journalist Eugene Lyons was by background and sentiment predisposed to early support of the Russian Revolution. A "friendly correspondent," he was one of a coterie of foreign journalists permitted into the Soviet Union during the Stalinist era because their desire to serve the revolution was thought to outweigh their desire to serve the truth. Lyons first went to the Soviet Union in 1927, and spent six years there. He was there as Stalin consolidated his power, through collectivization and its consequences, as the cultural and technical intelligentsia succumbed to the secret police, and as the mechanisms of terror were honed. As Ellen Frankel Paul notes in her major new introduction to this edition, "It was this murderous reality that Stalin's censors worked so assiduously to camouflage, corraling foreign correspondents as their often willing allies." Lyons was one of those allies. Assignment in "Utopia" describes why he refused to see the obvious, the forces that kept him from writing the truth, and the tortuous path he traveled in liberating himself. His story helps us understand how so many who were in a position to know were so silent for so long. In addition, it is a document, by an on-the-scene journalist, of major events in the critical

period of the first Five-Year Plan. As Ellen Frankel Paul notes in her major new introduction to this new edition, *Assignment in "Utopia"* is particularly timely. The system it dissects in such devastating detail is in the process of being rejected throughout Eastern Europe and is under challenge in the Soviet Union itself. The book lends insight into the "political pilgrim" phenomenon described by Paul Hollander, in which visitors celebrate terrorist regimes, seemingly oblivious to their destructive force. The book is valuable for those interested in the Stalinist era in the Soviet Union, those interested in radical regimes and political change, as well as those interested in better understanding current events in Europe. It will also be useful for the tough questions it poses about journalistic ethics.

The Silver Star-awarded marine chronicles his service in Iraq in this "transcendent memoir of military service and its personal consequences" (Ralph Peters, Lt. Col., ret., author of *Looking For Trouble*). In April, 2003, an AP photographer captured a striking image seen around the world of Gunny Sergeant Nick Popaditch smoking a victory cigar in his tank, the haunting statue of Saddam Hussein hovering in the background. Though immortalized in that moment as "The Cigar Marine," Popaditch's fighting was far from over. The following year, he fought heroically in the battle for Fallujah and suffered grievous head wounds that left him legally blind and partially deaf. But he faced the toughest fight of his life when he returned home: the battle to remain the man and Marine he was. At first, Nick fights to get back to where he was in

Iraq—in the cupola of an M1A1 main battle tank, leading Marines in combat. As the seriousness and permanence of his disabilities become more evident, Nick fights to remain in the Corps in any capacity and help his brothers in arms. Then, following a medical retirement, he battles for rightful recognition and compensation for his disabilities. Throughout his harrowing ordeal, Nick fights to maintain his honor and loyalty, waging all these battles the same way—the Marine way—because anything less would be a betrayal of all he holds dear.

They say there are no second acts in American lives, and third acts are almost unheard of. That's part of what makes Brian Wilson's story so astonishing. As a cofounding member of the Beach Boys in the 1960s, Wilson created some of the most groundbreaking and timeless popular music ever recorded. With intricate harmonies, symphonic structures, and wide-eyed lyrics that explored life's most transcendent joys and deepest sorrows, songs like "In My Room," "God Only Knows," and "Good Vibrations" forever expanded the possibilities of pop songwriting. Derailed in the 1970s by mental illness, drug use, and the shifting fortunes of the band, Wilson came back again and again over the next few decades, surviving and—finally—thriving. Now, for the first time, he weighs in on the sources of his creative inspiration and on his struggles, the exhilarating highs and the debilitating lows. *I Am Brian Wilson* reveals as never before the man who fought his way back to stability and creative relevance, who became a mesmerizing live artist, who forced himself to reckon with his own complex legacy, and who finally completed *Smile*, the legendary unfinished Beach Boys record that had become synonymous with both his genius and its destabilization. Today Brian Wilson is older, calmer, and

filled with perspective and forgiveness. Whether he's talking about his childhood, his bandmates, or his own inner demons, Wilson's story, told in his own voice and in his own way, unforgettably illuminates the man behind the music, working through the turbulence and discord to achieve, at last, a new harmony.

This second edition emphasizes the environmental impact on reproduction, with updated chapters throughout as well as complete new chapters on species such as sharks and rays. This is a wide-ranging book that will be of relevance to anyone involved in species conservation, and provides critical perspectives on the real utility of current and emerging reproductive sciences. Understanding reproductive biology is centrally important to the way many of the world's conservation problems should be tackled.

Currently the extinction problem is huge, with up to 30% of the world's fauna being expected to disappear in the next 50 years. Nevertheless, it has been estimated that the global population of animals in zoos encompasses 12,000 – 15,000 species, and we anticipate that every effort will be made to preserve these species for as long as possible, minimizing inbreeding effects and providing the best welfare standards available. Even if the reproductive biology community cannot solve the global biodiversity crisis for all wild species, we should do our best to maintain important captive populations. Reproductive biology in this context is much more than the development of techniques for helping with too little or too much breeding. While some of the relevant techniques are useful for individual species that society might target for a variety of reasons, whether nationalistic, cultural or practical, technical developments have to be backed up by thorough biological understanding of the background behind the problems.

For sixteenth-century Italian masters, the creation of art was a contest. They knew each other's work and patrons, were colleagues and rivals. Survey of this artistic rivalry, the emotional and professional circumstances of their creations.

"Elephant's Graveyard is the unfortunately true story of Mary, an elephant who went berserk during a parade through the middle of a small town in Tennessee in 1916. The townspeople demanded justice for her actions, which led to a very unfortunate set of circumstances. The play combines historical fact and legend, exploring the deep-seated American craving for spectacle, violence and revenge."--George Brant's interview answer to Adam Szymkowicz in "I Interview Playwrights Part 48: George Brant" by Adam Szymkowicz.

Poverty has dire consequences on the ability to fulfil one's aspirations for life. Poverty has strong implications for social cohesion and societies' abilities to function in harmonious ways. This book presents the readers with the core concepts, latest development and knowledge about policies that work to eliminate absolute poverty. This volume shows what the consequences are for the quality of life of those living in poverty. It describes life for people in poverty in general, but also deals more specifically with children, in-work poverty and the elderly, thus providing a life, generational and global perspective on poverty, including the impact on people's happiness levels. The book also discusses policies aimed at poverty reduction, such as changes to the labour market - including the risk of working poor - and shows that there is a variety of possible instruments available to reduce poverty. These range from direct provision of social security to ensuring education and a better functioning labour market. Written in an engaging and accessible style, the book provides a succinct insight into the concept of poverty, how to measure it, the situation of poverty around the globe as well as different types of possible interventions to cope with poverty. Supporting theory with examples and case studies from a variety of contexts, suggestions for further reading, and a detailed glossary, this text is an essential read for anyone approaching the study of poverty for the first time.

Travis Pastrana, the most celebrated freestyle motocross rider in the world, knows no bounds. In 1999 he celebrated his first X Games gold by launching his bike into San Francisco Bay. Three years later, he rode straight into the Grand Canyon. On purpose.

In *The Big Jump: The Tao of Travis Pastrana*, he makes his biggest leap yet, revealing for the first time the methods (and madness) that fuel his amazing feats. At 14 Pastrana was the youngest World Freestyle Motocross champion. At 17 he was the youngest racer ever to represent Team USA in the Motocross des Nations. Each of *The Big Jump's* chapters builds toward another breathtaking accomplishment, ending with the "impossible" double backflip during X Games 12 that brought Pastrana not just gold but certified legend status. With a foreword by Mat Hoffman, the godfather of BMX, *The Big Jump* is a fuel-injected ride into the mind and heart of Travis Pastrana.
