BOOK OF BEGINNER TATTOO STENCILS skulls, monsters, pin up girls, praying hands and much more Disrupting commonly held notions about who gets tattooed and why, The Tattoo Project describes, illustrates, and celebrates the social significances of commemorative tattoos. Written by scholars from various disciplines, as well as by community members and practitioners, this edited collection considers the meanings people make from their experiences of love, loss, trauma, resilience, and change, and why they choose to inscribe those meanings on their bodies. This methods-based text also examines the process of building a community-contributed digital archive of tattoo photos and stories, the result of which inspired the contributions to this book. Writing at the intersections between the public and the private, the authors consider the production and mobilization of knowledge across communities, disciplines, and space. Featuring beautiful tattoo photography, personal narratives from project participants, and original poetry by Priscila Uppal, The Tattoo Project is a novel read that bridges the gap between academic and popular audiences. This timely collection is a valuable resource for courses across the social sciences and humanities and for anyone interested in tattoos and their significance.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

In this groundbreaking analysis of personality type, bestselling author of *Better Than Before* and *The Happiness Project* Gretchen Rubin reveals the one simple question that will transform what you do at home, at work, and in life. During her multibook investigation into understanding human nature, Gretchen Rubin realized that by asking the seemingly dry question "How do I respond to expectations?" we gain explosive self-knowledge. She discovered that based on their answer, people fit into Four Tendencies: Upholders, Questioners, Obligers, and Rebels. Our Tendency shapes every aspect of our behavior, so using this framework allows us to make better decisions, meet deadlines, suffer less stress, and engage more effectively. More than 600,000 people have taken her online quiz, and managers, doctors, teachers, spouses, and parents already use the framework to help people make significant, lasting change. The Four Tendencies hold practical answers if you've ever thought: • People can rely on me, but I can't rely on myself. • How can I help someone to follow good advice? • People say I ask too many questions. • How do I work with someone who refuses to do what I ask—or who keeps telling me what to do? With sharp insight, compelling research, and hilarious examples, *The Four Tendencies* will help you get happier, healthier, more productive, and more creative. It's far easier to succeed when you know what works for you.

"Fascinating.... Lays a foundation for understanding human history."—Bill Gates In this "artful, informative, and delightful" (William H. McNeill, *New York Review of Books*) book, Jared Diamond convincingly argues that geographical and environmental factors shaped the modern world. Societies that had had a head start in food production advanced beyond the hunter-gatherer stage, and then developed religion --as well as nasty germs and potent weapons of war --and adventured on sea and land to conquer and decimate preliterate cultures. A major advance in our understanding of human societies, *Guns, Germs, and Steel* chronicles the way that the modern world came to be and stunningly dismantles racially based theories of human history. Winner of the Pulitzer Prize, the Phi Beta Kappa Award in Science, the Rhone-Poulenc Prize, and the Commonwealth Club of California's Gold Medal.

(Greenleaf Book Group) Whether you're a budding entrepreneur, an established small business, a social media influencer, a marketer at a large corporation—or somewhere in-between—the idea of being a "brand" is considered essential to the development of a solid marketing strategy. But what if it's not? In *Tattoos, Not Brands: An Entrepreneur's Guide to Smart Marketing and Business Building*, media innovator Clint White turns branding on its head. He shows how his flexible "tattoo" approach to consumer engagement is a better choice for most business and organizations. Unlike market-driven brands, tattoos are mission driven. They're personal, relatable, and nimble enough to evolve with consumer needs—and they don't break the bank. They get consumers talking enthusiastically on and offline about how your product or service makes a difference in their lives. Drawing upon research, psychology, and decades of experience, *Tattoos, Not Brands* offers an innovative approach to marketing. It includes simple steps to prepare for success and identify the approach to marketing that will best work for you and your product or service. After all, you're a tattoo, not a brand.
