The American Taxi has been providing a vital public service for 100 years! Enjoy the Taxi experience through photographs and the history of famous taxi marques, such as Yellow, General, Checker, DeSoto, Packard, Plymouth, Ford, & Studebaker - many minor makes are also represented with forgotten names like Rockwell, Murphy, Oakland, Hupmobile and Stearns Knight. Oddball experiments, unusual taxis, lights, meters, and taxi memorabilia are highlighted. A walk through time illustrates the effect of regulations on taxis and how that led to technical advances and body changes.

Despite its promise of freedom and autonomy, the ubiquity of the automobile has influenced unforeseen ecological, social, and political change. In *Against Automobility*, a panel of distinguished scholars take a critical look at the contradiction of the automobile. A critical account of the impact of the car on society, which is both liberated by and reliant upon motor vehicles. Written by a panel of distinguished scholars from varying disciplines in the humanities and social sciences. Examines automobility's effect on environmental, social, and political issues. Will be of interest to those whose research focuses on geography, politics, consumption and cultural studies, critical theory, and the sociology of objects and everyday life.

This is an exciting time to be an academic advisor—a time in which global recognition of the importance of advising is growing, research affirms the critical role advising plays in student success, and institutions of higher education increasingly view advising as integral to their missions and essential for improving the quality of students' educational experiences. It is essential that advisors provide knowledgeable, realistic counsel to the students in their charge. The *New Advisor Guidebook* helps advisors meet this challenge. The first and final chapters of the book identify the knowledge and skills advisors must master. These chapters present frameworks for setting and benchmarking self-development goals and for creating self-development plans. Each of the chapters in between focuses on foundational content: the basic terms, concepts, information, and skills advisors must learn in their first year and upon which they will build over the lengths of their careers. These chapters include strategies, questions, guidelines, examples, and case studies that give advisors the tools to apply this content in their work with students, from demonstrations of how student development theories might play out in advising sessions to questions advisors can ask to become aware of their biases and avoid making assumptions about students to a checklist for improving listening, interviewing, and referral skills. The book covers various ways in which advising is delivered: one-to-one, in groups, and online. The *New Advisor Guidebook* serves as an introduction to what advisors must know to do their jobs effectively. It pairs with *Academic Advising Approaches: Strategies That Teach Students to Make the Most of College*, also from NACADA, which presents the delivery strategies successful advisors can use to help students make the most of their college experience.

Big History is a new field on a grand scale: it tells the story of the universe over time through a diverse range of disciplines that spans cosmology, physics, chemistry, astronomy, geology, evolutionary biology, anthropology, and archaeology, thereby reconciling traditional human history with environmental geography and natural history. Weaving the myriad threads of evidence-based human knowledge into a master narrative that stretches from the beginning of the universe to the present, the Big History framework helps students make sense of their studies in all disciplines by illuminating the structures that underlie the universe and the connections among them. *Teaching Big History* is a powerful analytic and pedagogical resource, and serves as a comprehensive guide for teaching Big History, as well for sharing ideas about the subject and planning a curriculum around it. Readers are also given helpful advice about the administrative and organizational challenges of instituting a general education program constructed around Big History. The book includes teaching materials, examples, and detailed sample exercises. This book is also an engaging first-hand ac-

count of how a group of professors built an entire Big History general education curriculum for first-year students, demonstrating how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike.

Sharpen advising expertise by exploring critical issues affecting the field Beyond Foundations, a core resource for experienced academic advisors, gives practitioners insight into important issues affecting academic advising. In addition to gaining understanding of foundational concepts and pressing concerns, master advisors engage with case studies to clarify their roles as educators of students, as thought leaders in institutions, and as advocates for the profession. Pillar documents—the NACADA Core Values, NACADA Concept of Academic Advising, and CAS Standards—serve as sources of both information and inspiration for those seeking to improve advising. New strategies inform advisors helping a diverse student population delineate meaningful educational goals. Each chapter prompts productive discussions with fellow advisors interested in cultivating advising excellence. To promote advisor influence in higher education, experienced contributors explain new trends—including the impact of external forces and legal issues on postsecondary institutions—and the evolution of advising as a profession and a field of inquiry. Expert insight and practical focus contribute to the development of experienced advisors. Use existing resources in new ways to master advising roles and encourage student success Apply theory to advance advising practice Create and optimize professional development opportunities Establish recognition for the contributions of academic advisors to the institution and higher education Face challenges created by the changing higher education landscape Advisors must meet the expectations of students, parents, faculty members, administrators, and outside agencies, all while navigating an increasingly complex range of issues presented by a student population unlike any that has come before. Beyond Foundations provides the insight and clarity advisors need to help students achieve their educational goals and to advance the field.

When the sky grows dark and the moon glows bright, everyone goes to sleep . . . except for the watchful owl! With a spare, soothing text and beautifully rich and textured illustrations of a starry night, this is the perfect “book of sleep.” Join the owl on his moonlit journey as he watches all the other animals settle in for the night: some sleep standing up, while some sleep on the move! Some sleep peacefully alone, while others sleep all together, huddled close. Il Sung Na makes his American debut with this gorgeous bedtime offering. While each animal rests in its own special way, little ones will also drift off to a cozy sleep.

Our Watch partnered with Australia's National Research Organisation for Women's Safety (AN-

ROWS) and the Victorian Health Promotion Foundation (VicHealth) to create *Change the story*: A shared framework for the primary prevention of violence against women and their children in Australia. The framework draws upon the latest international evidence and consultations with over 400 stakeholders across Australia to explore what drives violence against women and what works to prevent it. It demonstrates that, while violence against women has no single cause, it is strongly associated with particular dimensions of gender inequality, in both public life and personal relationships. It asserts that an Australia where women and their children live free from violence is an achievable long-term goal, but one that can only be realised by addressing the drivers of this violence, which are deeply entrenched in our social and cultural norms structures and practices, across our communities and in our daily lives. *Change the story* details the key elements required to create a strategic, collaborative and consistent national approach to preventing violence against women. The framework:\* outlines 10 essential and supporting actions to prevent violence against women by addressing its gendered drivers and reinforcing factors\* provides evidence-based guidance to government, the private sector, civil society and communities on how to lead, coordinate, resource and support effective prevention effort across Australia\* aims to inform and support the development of policy and legislation, prevention programs, strategies and initiatives of all kinds, and advocacy. The framework demonstrates how, by working together, governments, organisations, communities and individuals can create a safer Australia built upon respect and equality. It offers a path towards this ultimate goal of social transformation, providing the necessary evidence, rationale and guidance to drive and support a significant and sustained nation-wide effort to prevent violence against women and their children.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

The only comprehensive swimming pool code coordinated with the current requirements in the I--Codes and APSP standards. Developed with the Association of Pool & Spa Professionals (APSP), to establish minimum regulations for public and residential pools, spas, and hot tubs using prescriptive and performance-related provisions. The ISPSC integrates seamlessly with the family of I--Codes and contains requirements that meet or exceed the Virginia Graeme Baker Act. The ISPSC also contains APSP-7 Standard for Suction Entrapment Avoidance. Important changes in the 2021 ISPSC include: It was clarified that flotation tank systems for sensory deprivation therapy are not within the scope of the ISPSC. Hot water storage tanks are now required to be listed and labeled to a standard. New sections were introduced into the code to cover solar thermal water heating systems. Installation requirements refer to the IMC.

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Book Three in the Playing for First baseball series. Continues the ongoing story of Amy Perry, first baseman for a major league baseball team, and Lisa Collins, the sportswriter who covers her story.

Ben Brooksby is a fifth-generation farmer from St Helens Plains in western Victoria. When he was younger, he struggled with anxiety and other mental health issues, as do so many others in rural communities. A simple social media post helped him to turn things around. After he shared a photo on Instagram showing himself naked in a truck full of lentils, he received a huge response, with other farmers wanting to share their own photos - and their stories. As the Naked Farmer movement grew, Ben met people from all around the country who wanted to get naked for mental health. As they got their kits off, they also opened up about their struggles. This is a heartwarming, moving and candid collection of stories of the challenges our farmers are facing, and the way these communities are banding together in response. Proudly supporting the Royal Flying Doctors Mental Health Service

Between the frantic pace of pre-pandemic life and the isolation and screen-time overload of 2020,

many kids are suffering from stress and other mental health issues. In Building Happier Kids, pediatrician Hansa Bhargava helps parents understand the impact of stress and shares concrete steps parents can take to reduce the pressure on their children and teens and increase their health and happiness. Dr. Bhargava prescribes taking a step back from today's non-stop pace and focusing on the basics of healthy eating, quality sleep, and unscheduled free time. Extracurricular commitments, homework, and ever-present electronic devices can make this seem easier said than done, but Dr. Bhargava offers realistic, balanced advice that will help prioritize health and restore the happiness of childhood.

Retention lingers as a major problem in higher education despite greater accessibility. The second edition of Seidman's groundbreaking book includes three new chapters to fill information gaps on critical topics: assessment in community colleges, retention theory, and online programs. This book will be of interest to practitioners and classroom professionals alike.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

"It's the statehouses, stupid." Laboratories of Autocracy shows that far more than the high-profile antics of politicians like Marjorie Taylor Greene or Jim Jordan—and yes, even bigger than Donald Trump's "Big Lie"—it's anonymous, often corrupt politicians in statehouses across the country who pose the greatest dangers to American democracy. Because these statehouses no longer operate as functioning democracies, these unknown politicians have all the incentive to keep doing greater damage, and can not be held accountable however extreme they get. This has driven steep declines in states like Ohio and others across the country. And collectively, it's placed American democracy in its greatest peril since the dawn of the Jim Crow era. But Pepper doesn't stop there. He lays out a robust pro-democracy agenda outlining how everyone from elected officials to business leaders to everyday citizens can fight back.

This book traces the development of popular cinema from its inception to the present day to understand why humankind has expanded its viewing of popular movies over the last century. Drawing from his extensive work as a psychologist studying artistic canons, James E. Cutting presents hundreds of films across a wide range of genres and eras, considers the structure of frame content, shots, scenes, and larger narrational elements defined by color, brightness, motion, clutter, and range of other variables. He examines the effects of camera lenses, image layout, transitions, and historical functions to classify different kinds of shots. He explains the arcs of scenes, the larger structure of sequences, and the scene- and sequence-like units that have become increasingly prevalent in recent years. The book then breaks movies into larger, roughly half-hour parts and espouses the psychological evidence behind each device's intended effect, ultimately exploring the rhythms of whole movies, the flow of physical changes, and the cinematic polyrhythms that have come to match aspects those in the human body. Along the way, the book considers cultural and technological evolutions that have contributed to shifts in viewers' engagement by sustaining attention, promoting understanding of the narrative, heightening emotional commitment, and fostering felt presence in the story. Movies on Our Minds asks critical questions about how our emotional

processes and the way our experiences of movies have changed over the course of cinematic history, for a cutting-edge look at what makes popular movies enjoyable.

"In the US, in Europe, and throughout the world, globalization, in tandem with technological progress, has left a massive number of people behind, feeling dispossessed, disenfranchised, and angry. Leading the charge of "hyperglobalization" during the second half of the last century, and enforcing the Western framework of austerity in the developing world has been the International Monetary Fund. Along with the World Bank and WTO, many consider the IMF one of the most consequential institutions to have pushed the world economy blindly towards excessive globalization, while not adequately considering its powerful negative consequences. In October 2017, however, the IMF convened with some of the world's most celebrated economists and experts on trade and globalization to have an honest discussion on the most pressing concerns the world faces today as a result of globalization, and how to address the extensive challenges it has created. Edited by chief economist Maurice Obstfeld and senior economist Luis Catao of the IMF, the book brings together a team of respected senior economists with the most promising younger scholars to address five major themes: how globalization affects economic growth and social welfare; potential political implications of an honest discussion of globalization, and that "free trade may not be politically viable"; free trade's role in global inequality; how workers adjust or not when they're dislocated by globalization; and how trade policy influences the way countries develop their economies and societies. The book could represent a historic milestone at which the world's top economists and policymakers have an unprecedented, honest debate about the real costs and consequences of globalization"--

People with mental illness are often stigmatized, both in the U.S. and around the world. Paradoxically, many in the mental health professions are themselves the source of a great deal of such stigma. Theoretical models in psychology and psychiatry have often blamed family members for causing mental illness, and too many practitioners and scientists hold to "us versus them" attitudes, showing extreme reluctance to admit personal and family experiences of mental illness. In Living with Mental Illness, mental health professionals and scientists, ranging from newly trained individuals to seasoned clinicians and researchers, tell their own and their families' stories of mental disorder, providing an unprecedented level of honesty and disclosure. The volume presents moving and inspiring narratives of serious mental disorder in individuals who have decided to focus their careers on mental illness in others. The editor, who has previously disclosed his own family's struggles with his father's lifelong, misdiagnosed bipolar disorder, utilizes his own experience to integrate, synthesize, and provide perspective on these revealing contributions. Through both personal narratives and accounts of parents, siblings, or offspring, the contributors convey the serious impairments that can accrue to those with mental illness, the strength and courage that emanate from such experiences, and the ways in which these experiences have contributed to their own decisions to enter the mental health field. Providing a humanizing portrayal of mental disorder, this volume will be indispensable reading for those in the mental health professions, trainees across many related fields, family members, persons contending with mental illness, and all those who wish to know more about the effects of mental illness on our society. Its stark stories of pain and impairment, and its clear messages of hope and courage, will inspire those working in the mental health professions, as well as their clients, for years to come.

Newly revised in 2020, NSBA's Key Work of School Boards framework identifies the core skills that effective boards need to ensure that all students achieve at high levels through excellence in gov-
