Equity and index options expire on the third Friday of each month. As that moment approaches, unusual market forces create option price distortions, rarely understood by most investors. These distortions give rise to outstanding trading opportunities with enormous profit potential. In Trading Options at Expiration: Strategies and Models for Winning the Endgame, leading options trader Jeff Augen explores this extraordinary opportunity with never-before published statistical models, minute-by-minute pricing analysis, and optimized trading strategies that regularly deliver returns of 40%-300% per trade. You'll learn how to structure positions that profit from end-of-contract price distortions with remarkably low risk. These strategies don't rely on your ability to pick stocks or predict market direction and they only require one or two days of market exposure per month. Augen also discusses:

- Three powerful end-of-cycle effects not comprehended by contemporary pricing models
- Trading only one or two days each month and avoiding overnight exposure
- Leveraging the surprising power of expiration-day pricing dynamics

If you're looking for an innovative new way to reignite your returns no matter where the markets move, you've found it in Trading Options at Expiration. "Learn and profit from Jeff Augen's book: It clearly explains how to take advantage of market inefficiencies in collapsing implied volatility, effects of strike price, and time decay. A must-read for individuals who are options oriented." --Ralph J. Acampora, CMT, Director of Technical Analysis Studies, New York Institute of Finance "A fantastic, insightful book full of meticulously compiled statistics about anomalies that surround option expiration. Not only does Augen present a set of effective trading strategies to capitalize on these anomalies, he walks through the performance of each across several expirations. His advice is practical and readily applicable: He outlines common pitfalls, gives guidance on timing your executions, and even includes code that can be used to perform the same calculations he does in the text. A thoroughly enjoyable read that will give you a true edge in your option trading." --Alexis Goldstein, Vice President, Equity Derivatives Business Analyst "Mr. Augen makes a careful and systematic study of option prices at expiration. His translation of price behavior into trading strategy is intriguing work, and the level of detail is impressive." --Dr. Robert Jennings, Professor of Finance, Indiana University Kelly School of Business "This book fills a gap in the vast amount of literature on derivatives trading and stands out for being extremely well written, clear, concise, and very low on jargon--perfect for traders looking to evolve their equity option strategies." --Nazzaro Angelini, Principal, Spearpoint Capital "Instead of considering macro-time strategies that take weeks to unfold, Jeff Augen is thinking micro here--hours or days--specifically the days or hours right before expiration, and harnessing grinding, remorseless options decay for profit. He builds a compelling case for the strategy here. The concept of using ratio spreads plus risk management for as brief a period as one day--open to close--to capture expiring premium is worth the price of admission alone. A superb follow-up to his first book. Must-read for the serious options student." --John A. Sarkett, Option Wizard software

The principles are sound as we have tested them with our software." --John Hill, President, Futures Truth, Co. "Bill Williams has always been an excellent teacher, taking complex terms and concepts and translating them into a clear, commonsense approach to trading. This book provides a complete trading program that reflects Bill's years of wisdom and experience in the marketplace." --Darrell Jobman, Editorial Consultant and former Editor-in-Chief of Futures magazine As today's market environment continues to change dramatically, more and more traders are discovering that traditional forecasting methods--pure technical analysis and fundamental analysis--just do not work. Sending out contradictory messages, these opposing schools of thought leave investors baffled about the future direction of the market, and consequently, at a loss as to how to tailor their trading systems. As a result, many practitioners have now turned to a new forecasting "cocktail" that combines traditional charting methodologies with chaos theory and human psychology. In this groundbreaking book, Bill Williams, a seasoned trader at the forefront of this dynamic new approach, explains exactly what it is, how it works in current stock and commodity markets, and how to use it to your advantage. Based on human nature rather than the vagaries of the market, the new trading dimension works on the premise that we trade not the market, but our

own belief system. By assessing what your personal biases are, you can determine how they influence your ultimate success-or failure-and then adjust your trading strategies accordingly. Written by an expert in the field who has been featured in Futures, Worth, Success, and other prominent publications, New Trading Dimensions takes the latest in scientific knowledge about human behavior and applies it directly to the fields of stock and commodity investing and trading. With straightforward guidelines, it shows you how to adopt the right attitude toward the behavior of the market and use the right tools (ATTITOLS) for profitable trading. Packed with practice exercises, specific applications to different types of investments, and a detailed review of important market signals, here's where you'll learn how to:

- \* Discover what the market wants and align your own beliefs with the direction of the market
- \* Apply chaos theory to trading and investing

If you are already making thousands of dollars trading Forex and make a full time extravagant living taking a couple of trades a month, then, please skip this book and go find something else to do. So, on the other side... do you live in a self denial chasing the next best system? STOP... Enough is enough, enough ridicule from your relatives and friends, it's time to show your guts. Face it, think about it, what would you think if you were on the other side looking through the eyes of your family and friends. All you see is a loser, getting ups and downs totally controlled by the next guru they read about. Doode, this gotta stop! Trust me, I know you feel the pain. I can kind of still remember it...kind of hard to do when I am sitting on my yacht in the Caribbean sipping from something that comes with umbrella on top. See, it didn't use to be that way, not too long, couple of years ago... but I will tell you about that later in my letter Ha! Forex trading is not all it is cracked up to be, it is a hard game controlled by robots and banks and foreign sovereign institutions. Keep reading if you know where I am coming from... Things didn't used to be all pink for me either, pain, loss, closed one losing account, opened second one, heard of such and such broker giving a certain deal on lots opened another account, lost all the money, started in the mini, macro, regular lots... Does that sound familiar, try to look from the outside, Forex is for crazy people, crazy winners or crazy losers. Now, if this is your first contact with Forex, I am really sorry you had to hear this small talk. I would rather be the nice guy, rather be the good news bearer, but please, don't kill the messenger, this is the bloody truth in Forex. You may be mad at me at this moment, but soon will come the moment you will thank me. Or you would rather stumble on a nice guru telling you all the lies, and how he can help you open a 10k account with a secret advantage. Or worse... He can even offer to manage your 10k, if you so willingly send him a check for the whole amount. The book you are about to read is the hard learned secrets of the successful traders and brokers and I am putting it all out for you. See I don't really need the 10 bucks, but I am making sure you appreciate the value you are getting. I have made my share trading the market, paid for all the yachts cars and toys and the farm, now it's your turn. I am sick and tired of the pain in the community and all the retail traders like yourself slaughtered by the hefty brokers. It is time to pay back, it is time for me to give back and to make sure the small trader has evened the plates no more secrets and golden grails uncovered. All the knowledge I am presenting in this book, comes from the school of hard knock, expensive paid Forex forums, where real traders hang out, not bothered by the rookies. Things I overheard on the golf course? Tell me about that, one of the guys I used to golf with executed only one trade a month, we used to call him the "ONE TRADE GUY...". How ridiculous that is? Hanging around, playing golf all month until a certain currency goes to a such and such monthly level, and pull the trigger to wipe out all the people with red eyes staring at the screens day and night, fighting with their spouses, wasting their lives in front of the broker platforms. I know what you are thinking...this guy is full of it! Well, I am fed up with the usual story that hits every newbie trader like you and I don't want you to have anything to do with it. So, I am giving you a choice: take this book read it, study and devour every single strategy, because it is real, out of the trenches uncompromised, winning truth coming from a real trader. Take the leap of faith, you are a couple mouse clicks away from finding the real freedom and trading like a pro. Take the click of faith! See you on the other side! Trader X
