The Pause Principle is the conscious, intentional process of step-

ping back, within ourselves and outside of ourselves, to lead forward with greater authenticity, purpose, and contribution. This value-creating methodology allows more examination, higher-order logic, rational analysis, more profound questioning, deeper listening, higher-quality presence, broader perspective, greater openness to diverse thinking and input, and ultimately more impactful, influential, and innovative action.

This book posits that success and effective leadership can be developed not by rushing in and being busy, but rather by taking a step back before taking action. By pausing, the author claims we achieve a high level of clarity and thus act in a more accurate manner so the action we do take is more effective.

"To thrive and to innovate in today's complex, globally connected world, leaders need sophisticated ways to step back to understand what they are facing within and outside themselves.
